

**COMMENT**

The US market gained yesterday backed by upbeat corporate reports and newsflow on M&A deals. Ongoing financial risks in Europe and slower economic recovery impede market enthusiasm. The Asian markets are staging mixed performance today, while rally at the opening bell turned into market correction on the back of weaker crude and metals prices

The Russian market is set to open on a positive side pricing in yesterday's rally in the USA. Its further performance is likely to hinge on the changes of global stock indices. In the near term, comments delivered by Fed's officials during the today's meeting, as well as the developments on the European public debt market would weigh on the performance in the near term. If newsflow does not add pessimism to the market, then buyers' activity will increase.

## METALS &amp; MINING

## Polymetal (PMTL): new acquisitions on the Far East. POSITIVE

**The deal worth of \$56 mn.** Polymetal purchased “Rudnik Avlayakan” and “Kirrankan” for 3.5 mn of its common shares from Doland Business Ltd. The sum of the deal amounted \$56 mn including debt of the purchased companies (or about \$135 per Oz of reserves). “Rudnik Avlayakan” and “Kirrankan” hold mining licenses for Avlayakan and Kirrankan gold and silver deposits, as well as exploration licenses for Avlayakan-Kirrankan watershed and Maymakan-Kundumi watershed properties (“AK project”), all located in the Khabarovsk region in the Far East of Russia.

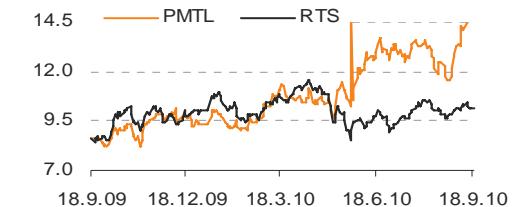

**Promising projects.** We positively regard this news for Polymetal. We think that the new company's acquisitions are promising. Besides, Polymetal has increased its gold and silver resource base by 2% and 0.5%, respectively. Deposits have a good location: they are situated in close proximity to each other and are linked by a 110-kilometer all-year road to Kiran, a port on the Sea of Okhotsk, located approximately 630 kilometers southwest from Okhotsk, the access port for the Polymetal's Khakanja mine. Avlayakan deposit has a high grade of gold in its indicated reserves – 17.1 g/t. Polymetal intends to start gold production on Avlayakan in 1Q11, interim production volume is estimated at about 30-50 Kt of ore. Now we do not have an official recommendation on Polymetal stock.

## TELECOMMUNICATIONS

**Far East Telecom (ESPK) 1H10 IFRS financials: strong on top line. NEUTRAL**

**OIBDA margin down 2 ppt y-o-y to 36%.** Yesterday Far East Telecom (UR) published its 1H10 IFRS numbers having closed the reporting season of inter-regional telecoms (IRs). The company recorded a substantial y-o-y increase in broadband subscribers, debt redemption and a slight deterioration in margins as headcount expenses outgrew the top line. In 1H10 Far East Telecom's revenues were up 5% y-o-y to RUR9.0 bn (\$297 mn) on the back of a 21% y-o-y increase in data transmission sales to RUR2.8 bn (\$93 mn) and 6% y-o-y growth in local sales to RUR3.4 bn (\$112 mn). The inflow of broadband clients was very impressive, up by 29% y-o-y to 482,000. The company raised expenses on personnel, repair and maintenance costs that brought to just a 1% y-o-y increase in OIBDA to RUR3.3 bn (\$108 mn), implying a 2 ppt decline in OIBDA margin to 36%. Keeping a rigorous control over expenses below the operating line, Far East Telecom showed a marginal 1 ppt y-o-y decrease in net margin to 16%.

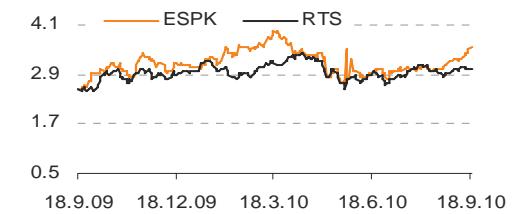

**Pay-TV and fixed-line broadband internet boost sales.** In the segments' revenues breakdown, pay-TV and Internet broadband delivered impressive growth rates, gaining 71% y-o-y to RUR181 mn (\$6 mn) and 26% y-o-y to RUR2.3 bn (\$75 mn), accordingly. Over the year, the company received 51,000 new pay-TV subscribers to 113,000. Fixed-line broadband Internet ARPU lowered 7% y-o-y, but remained high at RUR809 (\$27) per month. Facing a tough competition from altnets and the Big-Three (consists of MTS (MBT – Buy), VimpelCom Ltd (VIP – Buy) and MegaFon), zonal and interconnect sales dropped 7% y-o-y to RUR1.2 bn (\$38 mn) and 13% y-o-y to RUR0.6 bn (\$21 mn), respectively. As of the end of 1H10, Far East Telecom's net debt plummeted 7% from the beginning of this year to RUR5.5 bn (\$176 mn) following a suit for IRs to cut a debt load.

**Negligible effect on current quotes; market is following a restructuring story.** The market does not react on IFRS statements, as the numbers are in line with those, already released, of other IRs and the market is rather looking at the reorganization story. For Far East Telecom the record date for interim 9M10 dividends is 23 September enabling to receive a dividend yield of 3.3% on commons and 8.0% on prefs (in not-annualized terms). For the cheapest entry into the enlarged Rostelecom we advice to purchase commons in CenterTelecom (ESMO – UR) and prefs in South Telecom (KUBNP – UR) and North-West Telecom (SPTLP – UR).

## REAL ESTATE &amp; DEVELOPMENT

**LSR Group (LSRG LI): 1H10 IFRS results preview. NEUTRAL**

**No surprises expected.** Today LSR Group is set to publish its 1H10 IFRS financial results. We expect the company to show neutral numbers. In particular, in 1H10 we forecast the company's revenue to increase by 6.9% y-o-y to \$656 mn, EBITDA to advance 1.4% y-o-y to \$174 mn and net income to rise 25.3% y-o-y to \$57 mn. According to our estimates, EBITDA margin will slightly decrease – by 1.4 ppt that is caused by the hike in prices for construction materials. We forecast LSR EBITDA margin over 1H10 at 27% that despite the weakness remains a quite good indicator. Net margin is estimated to grow by 1.3 ppt to 8.8% that would be, in our opinion, associated with lower financial expenses. The funds from April's SPO allowed the company to reduce its debt, which 2010 stood at RUR36.3 bn as of 31 May vs. RUR39.2 bn in 1H09.

**2H10 will be better.** We foresee the financial improvements of LSR Group in 2H10. First, historically financial results of the real estate and construction companies have turned to be better in the second half of the year due to the terms of contract closing and growth of sales of residential real estate. Secondly, financial improvements would come as a consequence of the company's expansion into Moscow region, in particular, the pre-sales start of residential properties of Nakhabino and Sacramento.

**We maintain our BUY recommendation on the stock.** In our view, LSR Group offers the opportunities to bet on the Russian real estate market recovery. Liaison with the state agencies enables the company to fill up the book of orders for social housing construction and ensures capacity utilization, thereby reducing market risks for LSR. Strengthening of LSR positions on Moscow market will support its high profitability level and boost its revenue growth in the long run. Our end-2010 target price for LSR Group is \$11.4/GDR and \$57.0/share per share.

SMALL CAPS

**Arbitration court of Perm region vetoed additional share issue of Chusovoy Metallurgical Works (ChMZ).**

The decision was approved as a interlocutory injunction at the suit of Quorum Fund Ltd. (holds 7.21% of ChMW) aimed to admit ChMW's Board decision from 7 July as invalid in part of the placement price (RUR268.82 (\$8.7)), so as EGM decision from 11 August. Following the placement, ChMW's charter capital could be increased by 8.2 times at the price by 2.6 times lower than the current bids as of the Board meeting date. The placement is supposed to be under a private subscription in favor of Metallurgical Investment Company, controlled by Valery Anisimov. As a result of the new share placement, the company could have received a controlling stake in ChMW.

This document is provided to you for informational purposes only and does not constitute an offer to buy, sell or subscribe to investment products described herein. The sources used for this report are believed to be reliable, but TKB Capital makes no representation as to their accuracy or completeness. The views, advice and recommendations contained within represent the analyst's view as of the publication date. Such views may change without notice and may contradict previously expressed views and recommendations. TKB Capital is under no obligation to bring such previously held views to the attention of the reader.

This report is intended for market professionals and institutional investors capable of assessing the risks associated with the securities mentioned herein. TKB Capital shall not be held liable for any losses or other damages which may occur as a result of using this information or investment decisions made on the basis of opinions and recommendations contained in this report. Some Russian equities experience volatility which increases their investment risk, as their value may fall causing losses if the investment is realized. Many Russian equities are illiquid, and some investments are not readily or quickly realizable in good markets, and in times of market duress they may be impossible to realize. Many Russian equities do not trade on a daily basis and thus do not have a daily price quote, giving rise to questions concerning their true value. TKB Capital can give no representation as to the absolute volatility or liquidity of any Russian equity, nor can it give any representation as to the true value of an illiquid security. The value of all ruble-denominated Russian equities is also dependent on currency fluctuations in addition to equity market conditions. Investors should conduct their own investigation and research into a given investment and make their own assessment as to the risks involved with a particular investment in Russian equities.

TKB Capital may trade for its own account based on any short-term or long-term recommendations or trade ideas. It may also trade in recommended securities in a manner that is contrary to any trade idea or recommendation.

This report may not be reproduced, distributed or published without the written agreement of TKB Capital.
