

(AMZN - AMAZON COM INC,15) Dynamic,0:00-24:00

1. Amazon dropped in a rising market. The NQ, & QQQQ were both up strongly at the time. Amazon was going against the market for no strong fundamental reason. A Bullish Engulfing formed on the 15 minute chart, indicating a potential reversal for AMZN.

2. Entry @ \$40.05
02/11/2005 15:40. Entry point at intersection of 5MA and high of Bullish Engulfing candlestick.

3. Half profit taken at stalling near half number \$40.45. AMZN was now acting in line with the market but still had residual weakness.

4. QQQ stalling and close below 10MA. Exit final half @ \$41.30 03/11/2005 16:51:00
Final profit \$0.83 per share
