

# TradeStation 8.7 (Build3085) – Offline Mode

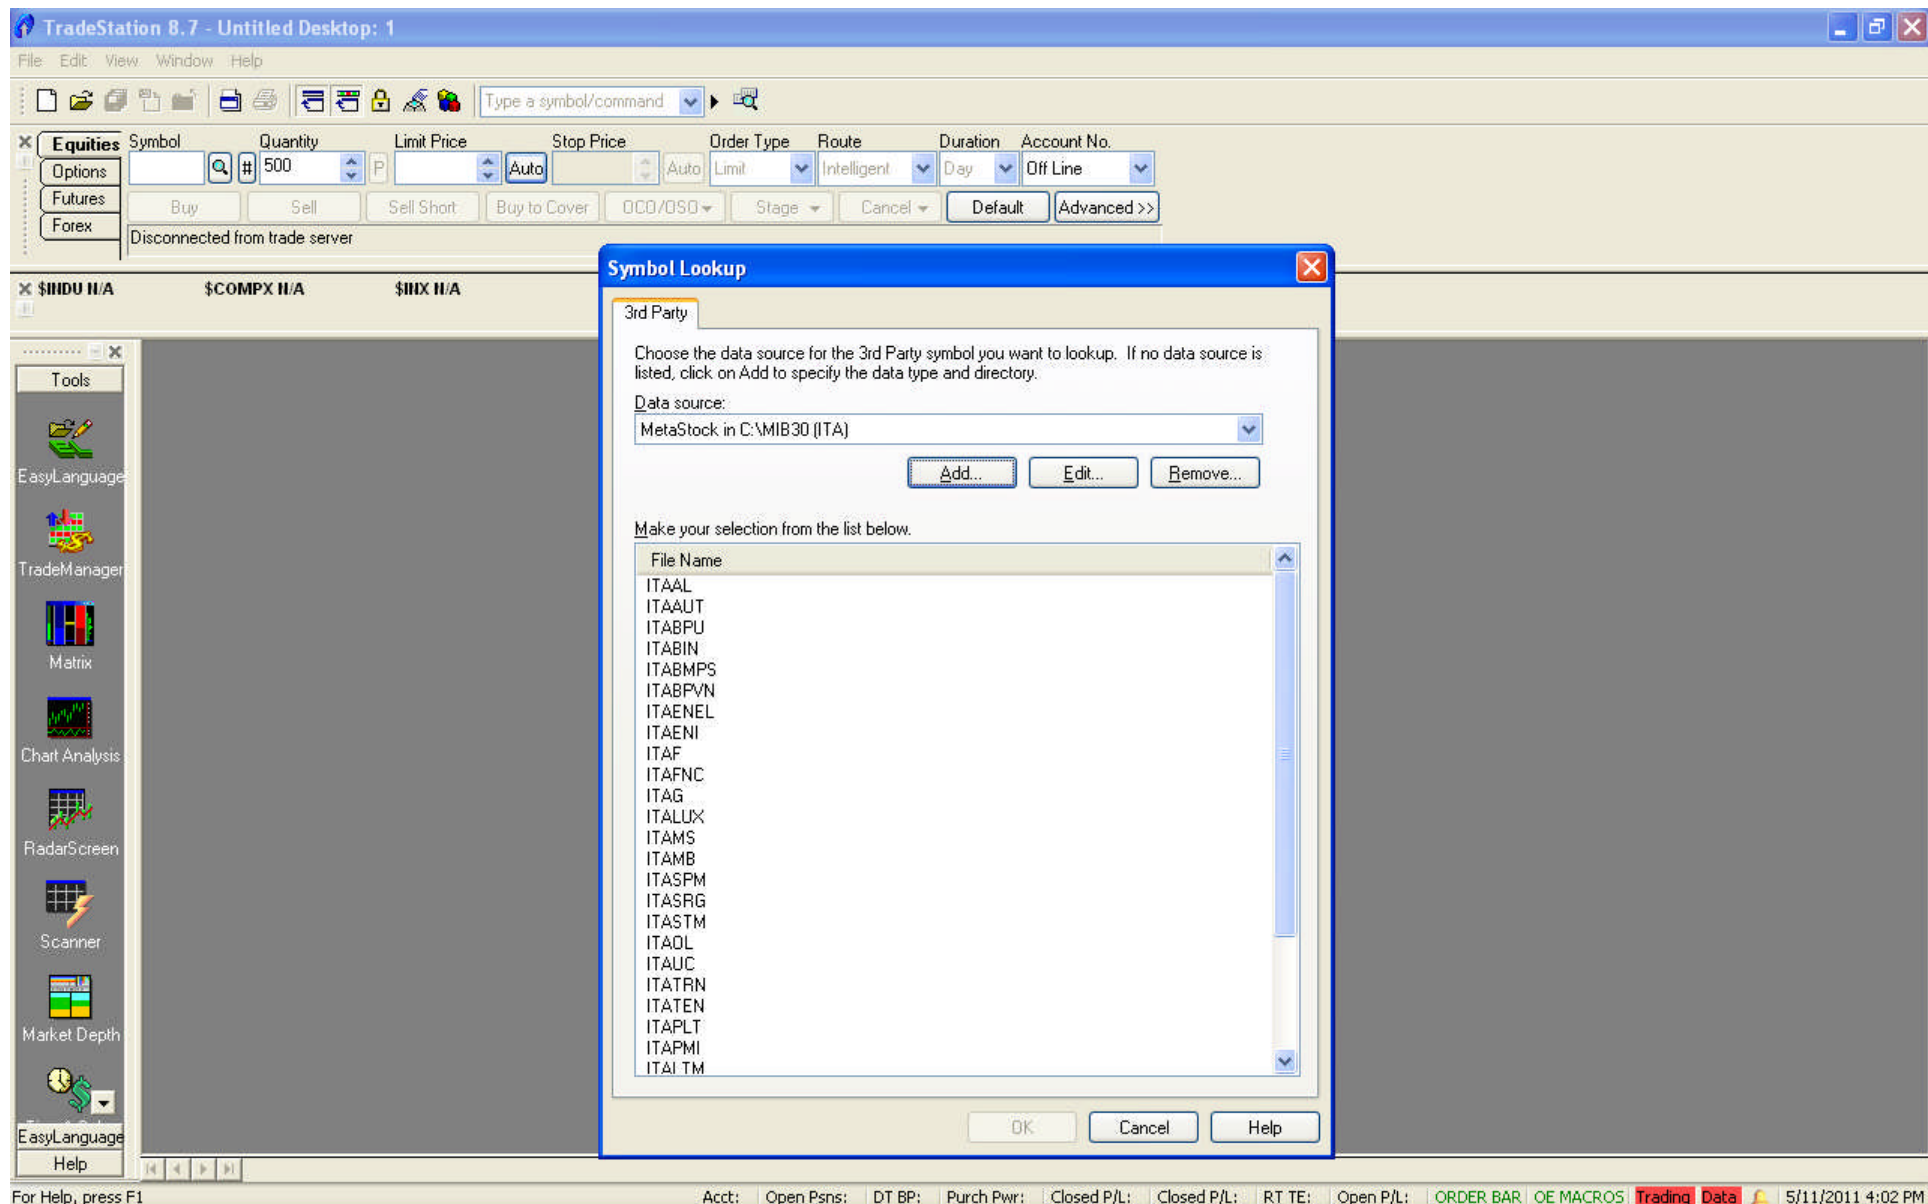

EOD Data

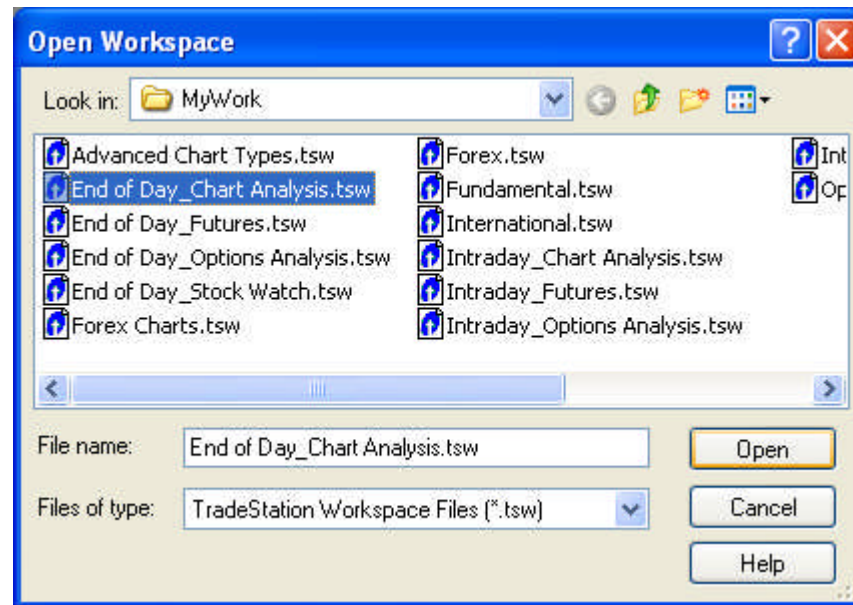

Default window with active Workspace

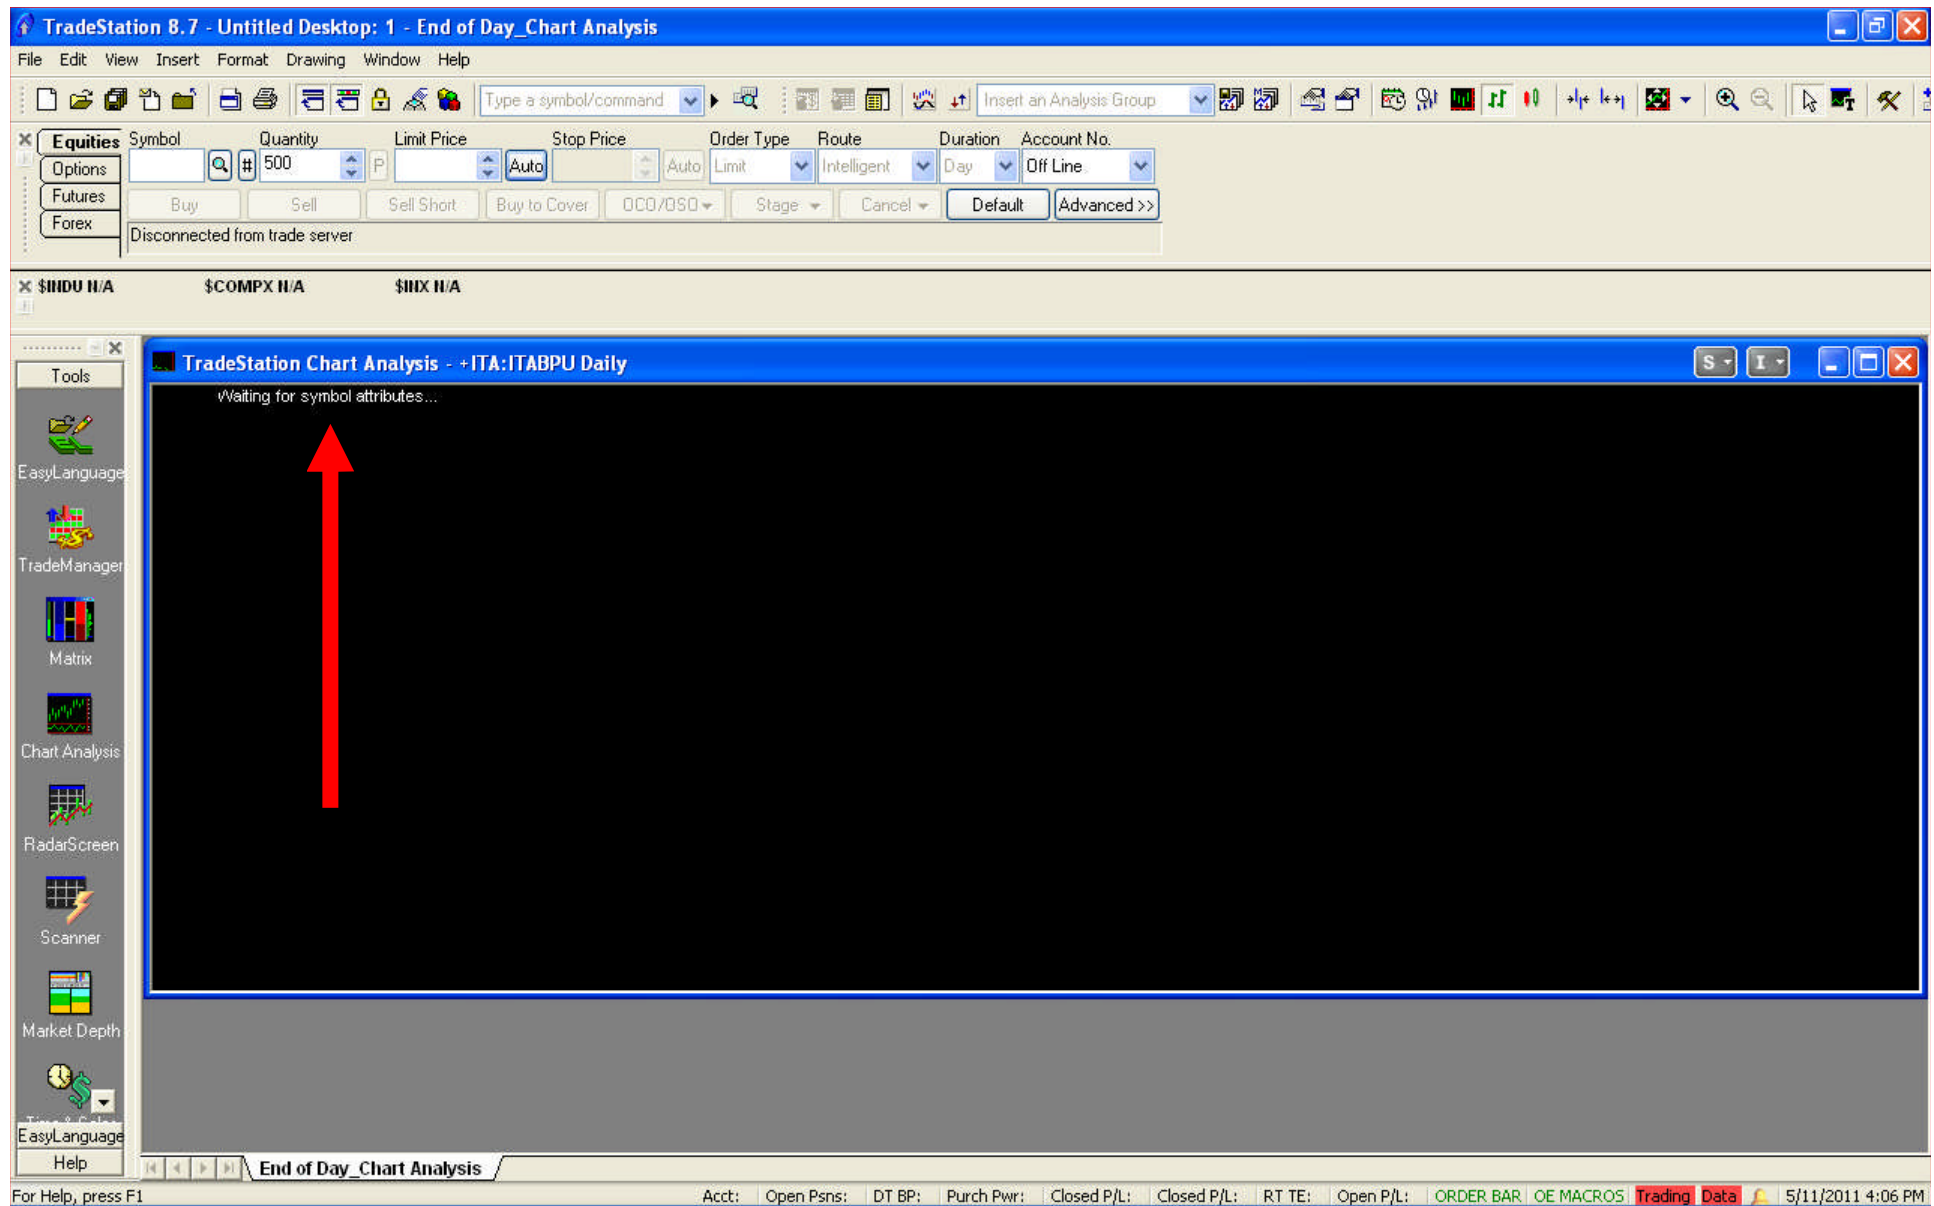

No Chart Window (on Omega Reasearch 2000i it was present)

I selected Symbol Lookup above, browse EOD directory and it seems that TS8.7 recognize all the Stocks Symbol

Then I select a Workspace EOD

I receive a symbol attributes warning.

.DOP file should contain attributes but it doesn't work.
